

# Nextcloud

## Povolení všech domén hostovaných na nextcloudu

Pridejte do config.php

```
'trusted_domains' =>
array (
  0 => '77.87.246.252',
  1 => 's1.spojenet.cz',
  2 => '*.spoje.net',
  3 => '*.spojenet.cz',
```

Nezapomente rozšířit SSL certifikát o další domény, které na nextcloudu hostujeme:

```
root@s1:~# certbot certonly --webroot --webroot-path /var/www/nextcloud/
--renew-hook "systemctl reload-or-try-restart apache2" --rsa-key-size 4096
-d s1.spojenet.cz -d vysehrad.spoje.net
Saving debug log to /var/log/letsencrypt/letsencrypt.log

- -
An RSA certificate named s1.spojenet.cz already exists. Do you want to
update
its key type to ECDSA?
- - - - -
- -
(U)pdate key type/(K)eep existing key type: u

- - - - -
- -
You have an existing certificate that contains a portion of the domains you
requested (ref: /etc/letsencrypt/renewal/s1.spojenet.cz.conf)

It contains these names: s1.spojenet.cz

You requested these names for the new certificate: s1.spojenet.cz,
vysehrad.spoje.net.

Do you want to expand and replace this existing certificate with the new
certificate?
- - - - -
- -
(E)xpand/(C)ancel: e
Renewing an existing certificate for s1.spojenet.cz and vysehrad.spoje.net

Successfully received certificate.
Certificate is saved at: /etc/letsencrypt/live/s1.spojenet.cz/fullchain.pem
```

Key is saved at: /etc/letsencrypt/live/s1.spojenet.cz/privkey.pem  
This certificate expires on 2024-08-20.  
These files will be updated when the certificate renews.  
Certbot has set up a scheduled task to automatically renew this certificate in the background.
